

Please read my Note out loud at the Board meeting under agenda item 11 on 3/23/17 in Brentwood Ca.

I am the Commodore of the Sea Ray Boat Club of Northern California. We are against the Twin Tunnels.

We have some of the most fertile soil in the land here in the San Joaquin Valley. But we can not grow the fruits, nuts, vegetable's, and grapes for wine, by giving our plants salt water. Our Farmers need fresh quality water here in the San Joaquin Valley..

There needs to be a Project that is good for all of California. Do not destroy the delta by taking more of our Water. There needs to be a better alternative for Southern California whether it be, **using the Desalination plants, more conservation including the use of drought tolerant plants in homes, offices and parks, and of course a Southern California system of storing rain water.** As the old saying goes, Stealing from Peter to Pay Paul is not the answer.

Please; **do not** Make Dual Conveyance, the Delta Tunnels an Option.

Thankyou. Shelia Shepherd
